# STAKEIT

## WELCOME TO THE WORLD OF STAKE

## THE IDEA

If the purpose of investing in cryptocurrencies is to earn profit,
why should you or any of us beat around the bush?

In the early days of crypto,
there were many altcoins created with a single purpose in mind.

"Profit"

These altcoins had many innovative ideas and implementations but
ultimately failed to last.

The reason is simple.

"Lack of a Long-term Plan"

The recent ICO craze and the increased popularity of cryptocurrency
and the blockchain industry has brought thousands of new projects on
board with thousands of new coins and tokens created.

We are in the wild west as they call it.

Now let's get back to the basics.

Welcome to the world of STAKE.

**STAKEIT**

Created with one purpose in mind.

**Long-term Profit**

## StakeIt Token

Name: StakeIt
Symbol: STAKE
Decimals: 8
Type: ERC20 Token
Blockchain: Ethereum
Total Supply: 100,000,000 STAKE

There will only ever be **100 million STAKE tokens** (initially).

Tokens will be **bought back and destroyed** continuously.

Staking takes place off-chain on our dashboard (website) as points on accounts.

## DISTRIBUTION

STAKEIT

TOTAL SUPPLY: 100 million STAKE
RESERVED FOR STAKING: 75 million STAKE
TOKEN SALE: 20 million STAKE
Bounty: 5 million STAKE

Bounty
5%

Token Sale
20%

Stake Reserve
75%

Stake reserve will be stored on **5 different addresses** for users to easily identify when the next tier will be activated (see staking plans below) as well as for security reasons.

Bounty address will be revealed to the public with all transactions transparently noted on a public ledger on the website.

Note that majority of the bounty tokens will be distributed once all the staking plans have ended and there are no more tokens to be distributed as *stake rewards*.

## STAKING PLANS

Staking plans are divided into **5 tiers**.

Stake Reserves (75 million tokens) are kept in **5 different addresses** (15 million tokens each).

**Tiers** are activated accordingly whenever Stake Reserve addresses run out of tokens to distribute.

For example, when all **15 million STAKE** from the **Tier 1** address has been spent/distributed, **Tier 2** will be activated and so on.

### TIERS & CHANGES

**Tier 1**: First 15 million from Stake Reserves
0.035% daily (Approximately 12.775% per year)
Fees: 2% withdrawal fees
Paid Staking Plans: Basic ($10), Premium($50), VIP ($200)

**Tier 2**: Second 15 million from Stake Reserves
0.036% daily (Approximately 12.775% per year)
Fees: 2% withdrawal fees
Paid Staking Plans: Basic ($20), Premium($100), VIP ($400)

**Tier 3**: Third 15 million from Stake Reserves (BEST STAKE RATE)
0.037% daily (Approximately 12.775% per year)
Fees: 2.5% withdrawal fees
Paid Staking Plans: Basic ($40), Premium($200), VIP ($800)

**Tier 4**: Fourth 15 million from Stake Reserves
0.038% daily (Approximately 12.775% per year)
Fees: 2.5% withdrawal fees
Paid Staking Plans: Basic ($80), Premium($400), VIP ($1,600)

**Tier 5**: Final 15 million from Stake Reserves
0.039% daily (Approximately 12.775% per year)
Fees: 3% withdrawal fees
Paid Staking Plans: Basic ($160), Premium($800), VIP ($3,200)

## HOW IT WORKS

Firstly, we would like to remind you that staking is a centralized option that we provide.

You are free to do whatever you want with STAKE tokens.

Feel free to just *hold* them under your ETH addresses.

For users to *stake* their tokens, they will be required to register on our website.

There will be 'DEPOSIT' and 'WITHDRAWAL' buttons available under your account

*(My account -> My STAKE)*

All tokens deposited are destroyed (the address is publicly available, see *Token Addresses – Revenues address – below).

Hence, the continuously decreasing total supply.

This means that when a user 'withdraws' his/her tokens from our website, the tokens are solely distributed from the 'Token Reserve' addresses.

Users can choose to withdraw by requesting a withdrawal at any time they want.

### Fees

Note that you will have to pay small fees in STAKE for withdrawals.

All tokens received as fees are destroyed.

All fees accumulated can be viewed on our 'Revenues' address which is publicly trackable via Ethereum blockchain.

This Revenues address is the address which receives all tokens deposited by users for staking.

There is also a minimum amount of STAKE required for deposits & withdrawals.

This is to ensure that your tokens stake properly according to 8 decimals as well as to ensure a healthy balance between supply X demand.

**It is inevitable that we will one day, run out of StakeIt tokens to distribute as staking rewards.**

Note that before we run out of Stake Tokens to distribute (at the end of Tier 5), we will stop all existing staking plans on our website.

This will happen when the Tier 5 Stake Reserves address has less than 5 million STAKE in total.

As we stop all staking plans on our website, we will distribute all existing pending payments (withdrawal) with all leftover tokens (if any) from Tier 5 Stake Reserves address sent to our Bounty address.

From this point on, the token completely switches into a 'bounty & giveaway' token.

All bounty & giveaway campaigns will be held on our 1-page AD platform.

During this period, our 1-page AD platform will play a vital part in keeping the total supply of the tokens decreased continuously (as advertisers will have to purchase ad spaces with StakeIt tokens and all

tokens received as such are destroyed permanently).

This period continues until we have completely run out of Bounty tokens (5 million) + leftover tokens from the Tier 5 Stake Reserves address.

When this happens, we will deem our staking and bounty plans to be officially over and the token's future will be in the hands of the community.

We believe that by this period, the token will already have a strong community with many use cases readily offered, created, and explored by the community members.

## TOKEN BUY & DESTROY PLANS

All StakeIt tokens received to our 'deposit' address will be destroyed.

Whenever a user withdraws his/her StakeIt tokens, they will be required to pay fees (in STAKE).

These fees (STAKE) will also be permanently destroyed.

Along with this plan, StakeIt website will feature a 1-page AD platform.

This AD platform will consist of 100 different AD slots.

Advertisers will be required to pay in StakeIt tokens.

STAKE Bounty & Giveaway campaigns will be held on this page to ensure constant in-flow of traffic and to attract more advertisers.

All StakeIt tokens received through this platform will also be destroyed.

Revenues are all accumulated under a single address.

Revenues address:

0x15FeA068839632bf9E580b73283778de9716eE09

Users will be able to track & view how all STAKE received are destroyed.

By destroying tokens, we really mean sending it to an ETH address whereby nobody owns it.

Our token destroy address is
0x000000000000000000000000000000000000dead
(ENS burn address).

If you would like to check the current total supply of StakeIt, you can do so by subtracting the number of destroyed tokens by a 100 million (100,000,000).

## TOKEN SALE

STAKEIT
TOKEN SALE

Token sale has ended successfully with over 2 million tokens sold within a period of 14 days.

**Token Sale period: 22/11/2017 – 5/12/2017 (14 days)**
**Token Price: 1 STAKE = $0.05**
**Minimum Purchase: 100 STAKE ($5)**
**Maximum Purchase: 10,000,000 STAKE**

**All unsold tokens were destroyed.**
